- **Stop on Win** - When any single round results with a win of any size, auto-bet deactivates.
- Each limit can be turned on or off by pressing on the checkbox next to it.
- To set the number of auto-bets rounds, the player picks the desired value from the

top list of optional values by pressing on the desired value. The selection mark is set on the last settings.

- When a limit is reached and the Auto-bet stops, a message pops in the center of the screen reading according to the limit:
 - "LOSS LIMIT REACHED"
 - "WIN LIMIT REACHED"
 - "SINGLE WIN REACHED"
 - "WIN REACHED"

Message will fade out after 5 sec or on any tapping (screen or button pressed)

To exit the auto bet panel, the player can:
