

What are the game controls used in Zodiac Fortune?

Game Controls

- **Buy Ticket** – Submits the bet and starts the round, changes to a reveal all button.

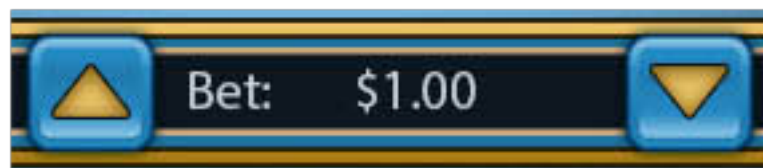

- **Reveal All** – Reveal all symbols.

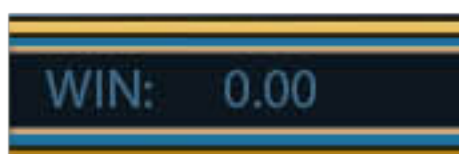

- **Balance** – Display player balance.

- **Bet** – Display current bet. Enable adjustment of bet with increase and decrease arrows.

- **Win** – Display current round win.

- **Auto-Bet** – Enables playing the game automatically for a predetermined number of rounds at the current bet configuration.

- **Help** – Opens Auto-bet settings

- **Full Screen Toggle** – Switch to full screen and back.

- **Sound** – Enables sound volume control.

- **Home** – Exit game.

- **Cashier** – Open player account.

- This game has no pay table.

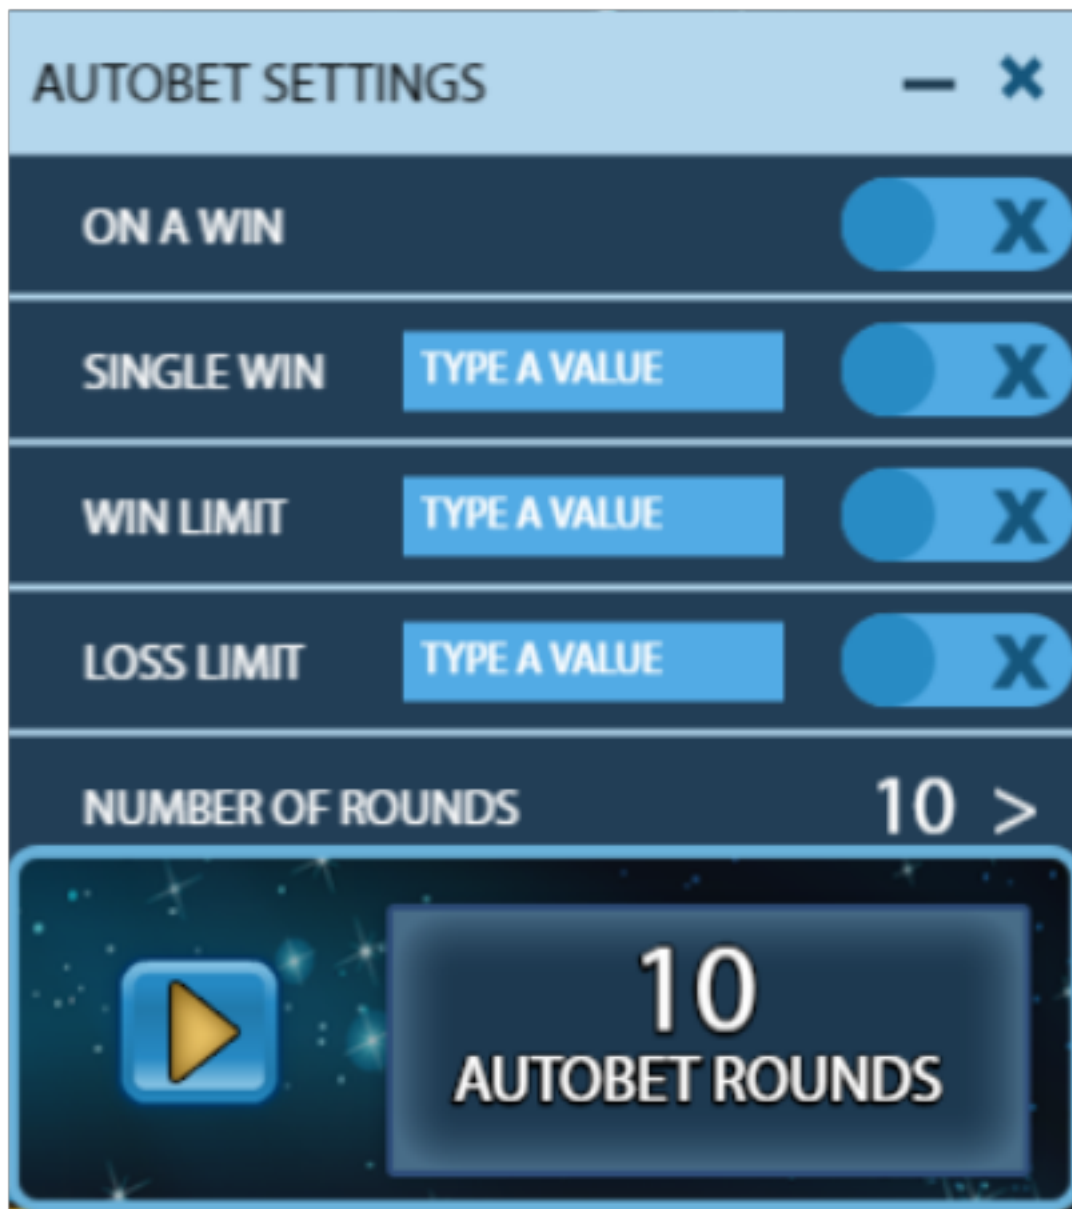

Autobet Settings

To use the auto bet, a player clicks the auto bet icon next to the “**Buy ticket**” button.

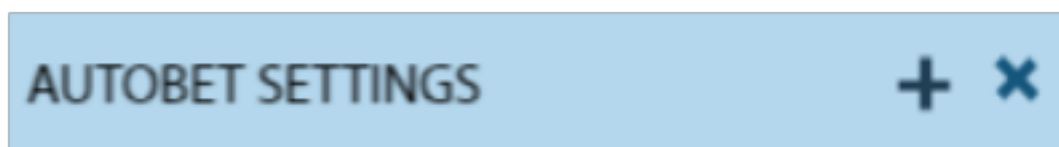

Autobet – Enables playing the game automatically for a predetermined number of spins at the current bet configuration.

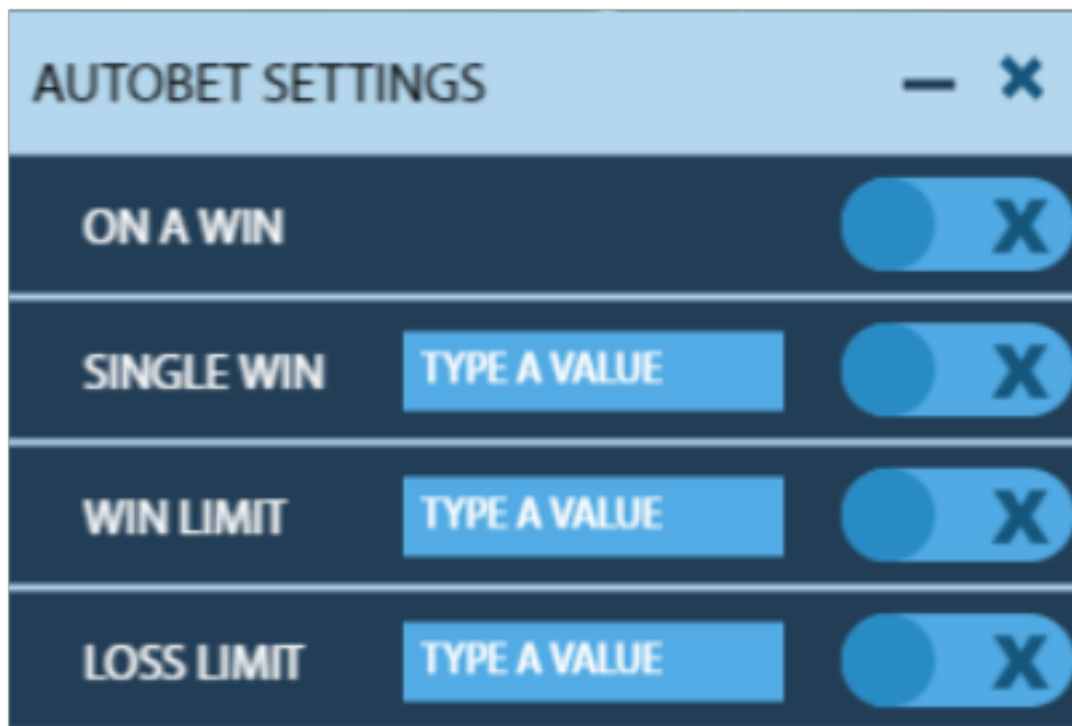

To set number of rounds, click the number of rounds panel, and then select the desired value of rounds.

To add limits, open the setting panel using the [+] sign.

Each setting can be set to on or off using the on/off switch.

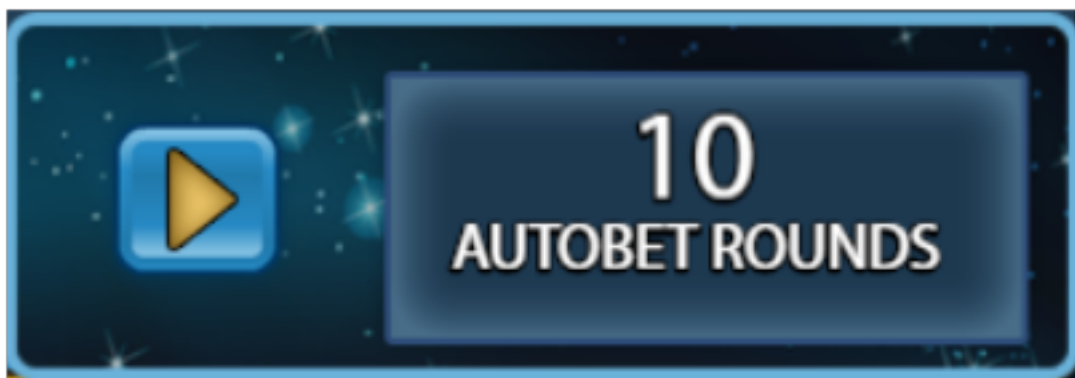

Some limits require a numeric value that must be entered before auto-bet activation. Limits without a valid numeric value will turn off once auto-bet is activated.

To close the setting panel press the [-] button.

To start an auto-bet session, press the **PLAY** button.

To Pause an auto-bet session, press the **Pause** button.

To exit the Auto-bet mode press the [X] button.

Auto-Bets Limits:

- **Loss Limit (Numeric value)** - Pauses the auto bet function (see below) when the total loss of the user so far ($\text{SUM}(\text{bet}) - \text{SUM}(\text{win})$) $\geq$ (Numeric value)
- **Single Win (Numeric value)** - Pauses the auto bet function (see below) when a single win payout $\geq$ (Numeric value) or more.
- **Win Limit (Numeric value)** - Pauses the auto bet function (see below) when the total Win of the user so far ($\text{SUM}(\text{bet}) - \text{SUM}(\text{win})$) $\leq$ (Numeric value)
- **Stop on Win** - When any single round results with a win of any size, auto-bet deactivates.
- Each limit can be turned on or off by pressing on the checkbox next to it.
- To set the number of auto-bets rounds, the player picks the desired value from the top list of optional values by pressing on the desired value. The selection mark is set on the last settings.
- When a limit is reached and the Auto-bet stops, a message pops in the center of the screen reading according to the limit:
 - "LOSS LIMIT REACHED"
 - "WIN LIMIT REACHED"
 - "SINGLE WIN REACHED"
 - "WIN REACHED"

Message will fade out after 5 sec or on any tapping (screen or button pressed)

To exit the auto bet panel, the player can:

- Start the auto-bet rounds by clicking “START”.
- Exit auto-bet completely by clicking the “return to game” button on the right.

Auto-Bet in the UK

Players from the UK who want to use the auto-bet feature must set a loss limit before engaging the auto-bet.

Any attempt to start auto-bet play with no valid value set in the loss limit field, will be denied and the message “set loss limit” will flash in the limit text field.

The Loss limit is on all the time and cannot be disabled.

The Loss limit is visible for UK players all the time the auto-bet panel is open.
