The Paytable in this game acts like a key, explaining the value of each symbol in the game. Each symbol has assigned to it a certain number value. The win amount is determined based on the number that the Paytable shows for a certain symbol multiplied by the line bet value that the player determines before he/she spins the reels.

You can reference the Paytable and use the following formula to calculate what your win will be: Line Bet Value (Player sets this before spinning) x The number the Paytable shows for total number of hits for any given symbol = win amount.

For example: If you (the player) placed a bet on lines 1 and 5 and the winning combination is three Spicy Chilli Pepper symbols in a row, this means that you have three hits. A “hit” is the number of times that the same number of symbols appeared in a row. When reading the Paytable, the hits appear "X" the point value The amount that

you won is calculated by multiplying the line bet value.

In Las Cucas Locas, the value of a Spicy Chilli Pepper symbol when it appears three times is 10 times the triggering bet. If the line bet value is ten, the total win amount here would be $10 \times 10 = 100$.

How to Win

1. The starting screen

This is what the game looks like when you open it. Now you will want to place your bets.

2. Bets placed (\$0.50) and lines chosen (25)

Here you will see that \$12.50 was the total amount bet.

3. Reels Spinning

This is what happened after you click on the button marked "Spin". Here, the reels are spinning.

4. Winning screen

Here you can see that the player has a winning symbol combination!

Wild Card and Scatter

The Paytable also shows you the wild card and scatter. The Wild Card is a symbol that can replace any other symbol (with the exception of the scatter) to make a winning combination. This symbol also doubles the value of any winning combination (only

once). In Las Cucas Locas, the Wild Card symbol is the Cockroach Bandit.

The Scatter symbol is a symbol that pops up on the reels simply to give you extra rewards. Regardless of its placement on the reels and prizes are given for the Scatter up to 5 times (if it appears 5 times). The prize is determined based upon the number of times the Scatter appears on the reels. The Scatter win is multiplied by your total bet amount and even if you don't have a line win, if the Scatter shows up you will still receive payment! In Las Cucas Locas, the Scatter symbol is the Cockroach Guitarist.

Note: In case of malfunction, all game plays and payouts will be voided.
