How to Read the Paytable

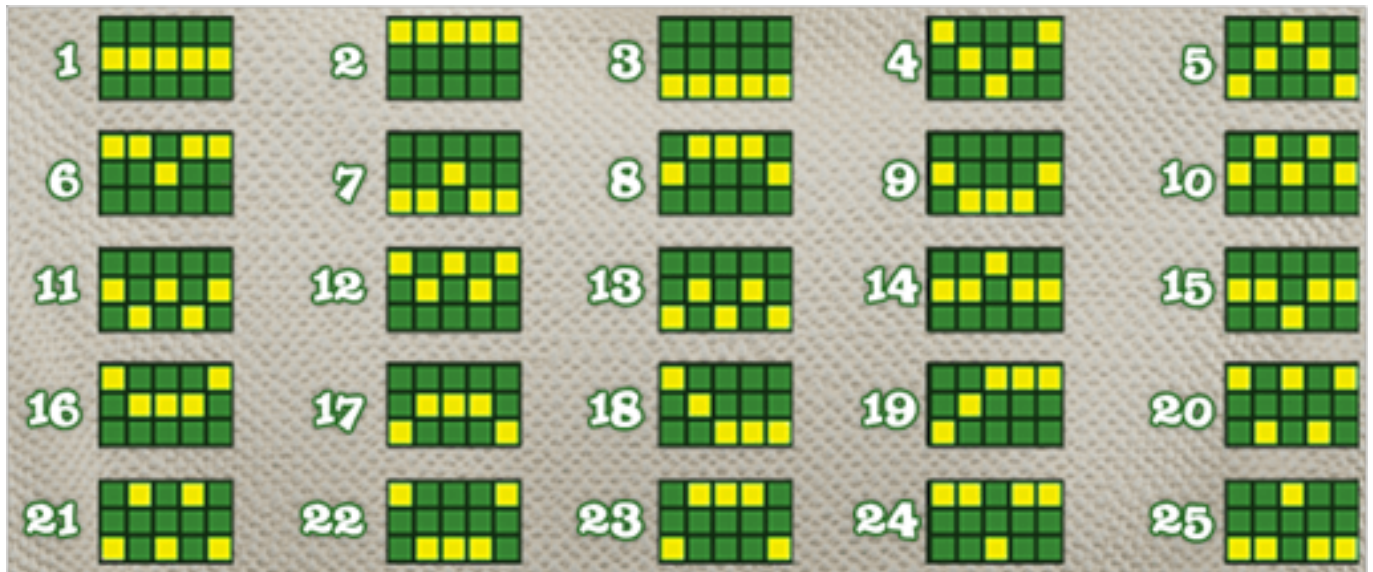

The paytable in a video slots game acts as a key, explaining the value of each symbol in the game. Each symbol has assigned to it a certain number value. The win amount is determined based on the number that the paytable shows for a certain symbol multiplied by the line bet value that the player determines before he/she spins the reels. You can reference the paytable and use the following formula to calculate what your win will be:

Line Bet Value (Player sets this before spinning) x the number the paytable shows for a total number of hits for any given symbol = win amount.
