

How can I change the settings for my preferences?

You can enable, disable or set particular account settings using your preferences settings. To change your preferences settings, please follow the steps below.

1. Sign in to your SBOBET account and click on the **Account** link located at the top of the page. Navigate to the **Preferences** page and select your preferred settings.

Move your mouse over to the icon located on the right of each option to view details of each setting.

2. Click the **Confirm** button to save your settings. A confirmation alert message box is displayed once you have saved your new preferences settings.
