

How do I play the Dance to the Beat bonus games feature in Dangdut Queen?

Dance to the Beat Bonus Game

Dance to the Beat bonus game will be triggered when the bonus symbol appears on reels 1 and 5 during the Free Spins game. In this bonus game, the player has to guess the right note to complete the song. The player has to choose which the good note among the 6 buttons is. The more right guesses the player has, the larger his chance to get the x50 multiplier. The different multipliers are ranging from x2, x5, x10, x15, x20, and x50. The prize from the bonus game will be multiplied by the total bet.

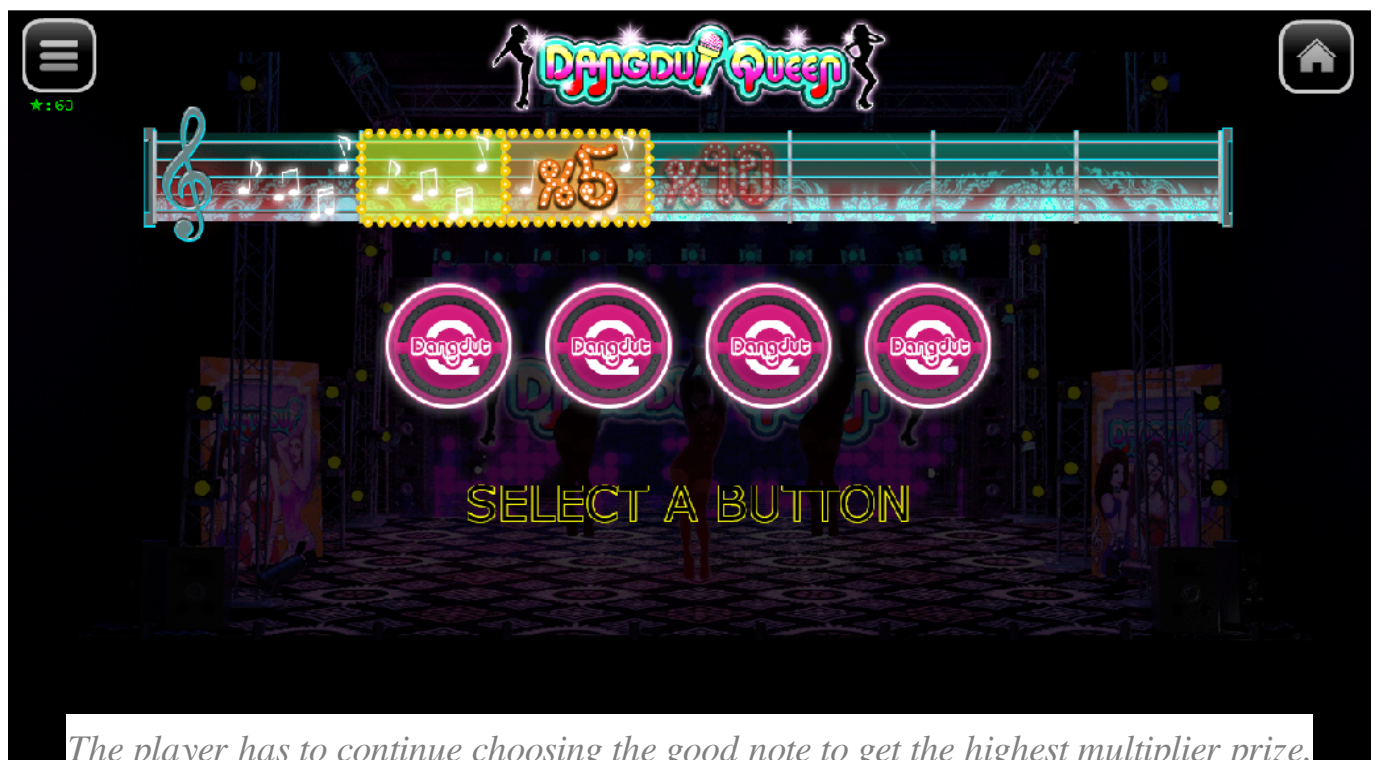

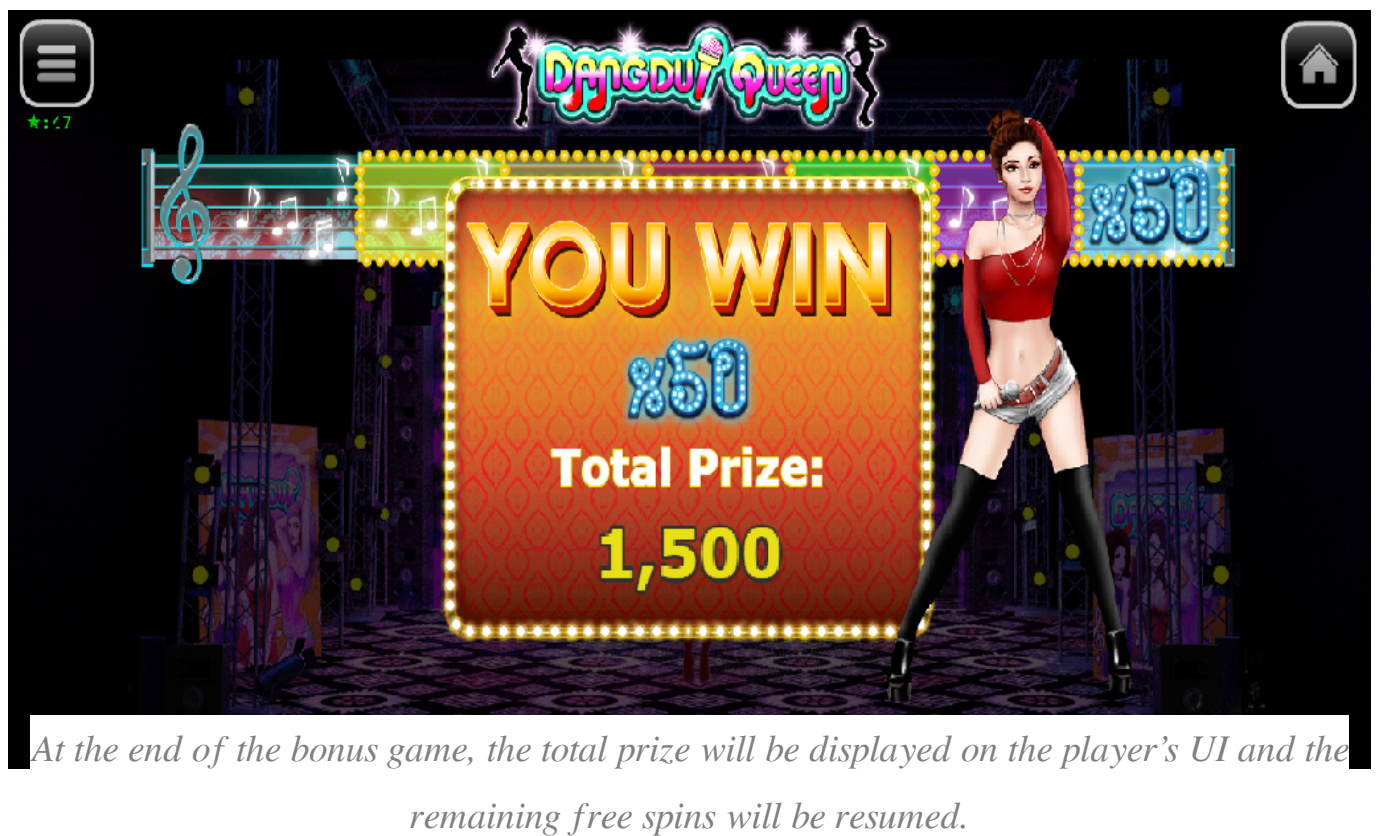

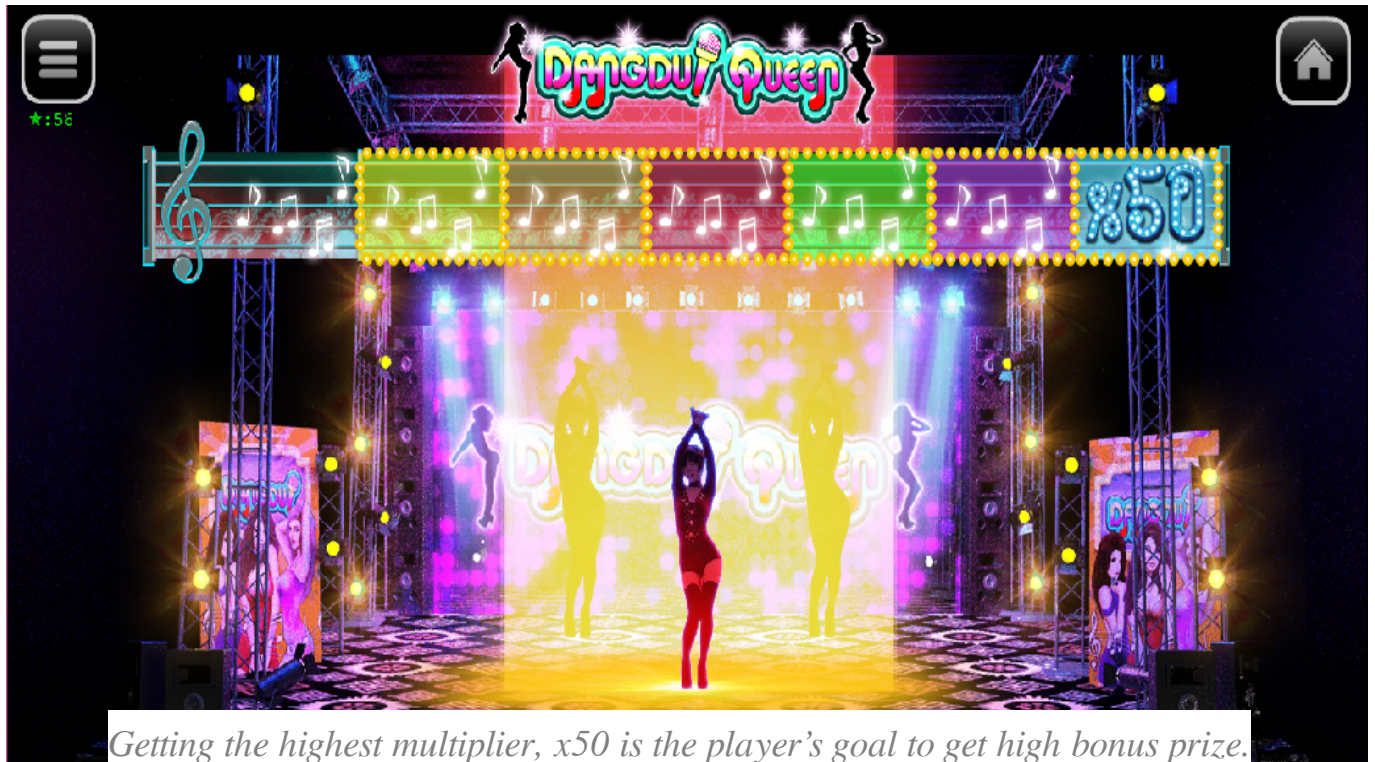

If the player picked the stop note, the bonus game will be over and the respective multiplier that the player got until he got the stop note will be his prize.

The player has to choose again with the remaining buttons if it is the good note or the stop note.

The player has to continue choosing the good note to get the highest multiplier prize.
